

## **Senior Installation & Service Engineer**

Bristol Based

*Installation, Servicing & Maintaining Intruder Alarms, Fire Alarms, CCTV and Access Control Systems.*

Due to continuous growth and expansion in our area BS1 Fire & Security Ltd have an opening for a motivated, experienced senior engineer who are able to work on their own initiative and who can demonstrate a good customer service led attitude, backed up with sound technical knowledge. This person will initially work alongside and be trained by an existing, experienced engineer. This opportunity is perfect for someone with a high level of security installation and maintenance experience.

**Specific duties** A successful candidate will be able to install and maintain security systems in both domestic and commercial environments. You must have the ability to see a project through the whole delivery process from first fix to commissioning and client hand over, you will be expected to deal directly with our customers, this will be working to a fixed schedule in a mainly 'on the road' based role.

As a senior engineer you will be expected to support the office and management with day to day tasks and generally take charge of the companies field based activities.

**Person specification:** This person will already be employed in a field-based engineering role – someone who is used to working with their hands and working 'in the field'. They will be easy-going but hardworking, and need to be friendly and approachable. They will set an example of excellent quality when installing and servicing our systems. Being in a position of responsibility they will be trustworthy and honest in their conduct while maintaining a high standard of personal presentation. A willingness to help and get involved with all aspects of the business particularly seeking to expand sales with new and existing customers is an advantage

### **Key Job Responsibilities**

- Servicing and maintaining various intruder, fire, CCTV and access control systems.
- Understanding the client's needs and fulfilling all jobs required
- Working within a team covering a local geographical area
- Working towards and exceeding maintenance and fault finding targets.
- Being part of a on call rota within your team.
- To actively support at all times, company policy and best practice in the area of security, with particular emphasis on the protection of sensitive customer information
- Any other reasonable requests from management
- Implement and act in accordance with the organisations information security policies
- Protect assets from unauthorised access, disclosure, modification, destruction or interference
- Implement particular security processes or activities, as requested by management
- Report security events or potential events or other security risks to the organisation

### **Role will include:**

- Setup and installation of monitored intruder and fire alarms & Analog / IP CCTV systems
- Monthly servicing of security systems including updating of alarm systems
- Occasional working at height
- Self-management and planning
- Traveling to sites in Bristol and surrounding areas
- On call standby
